## ENGINEERING SERVICES

### Partners in Business

#### Exceptional Services

Our clients are often heavily tasked with running a production facility, which can interfere with their progress in process optimization, document upkeep, engineering work, preparing for upcoming projects, project forecasting, etc. As a partner in business, it is ESCO's responsibility to offer our clients with a dedicated Engineering Services group of exceptional engineers ready to help manage burdens by offering continual site visits to maintain plant systems, provide remote support, front-end engineering design, industrial information technology services, and value-adding solutions.

#### Partner with ESCO

When you work with ESCO, you are working with a company that forms strong relationships with our clients which gives us in-depth knowledge of your plant, what its needs are, and how it runs. It's a partnership approach, meaning we partner with our clients in business and become an integral part of your team.

ESCO has been in business for over 50 years, and has specialized in plant automation and electrical engineering for over 27 years. We empower our people with tools and resources to ensure their success so they can deliver exceptional services. ESCO employs the industry's experts, and through our experience we deliver on our promises with solutions that add value.

#### Take Advantage

- Relieve support duties from your engineers
- Improve and organize plant support
- Execute plant initiated projects through our skilled team of engineers
- Improve the accuracy of data that funnels into your larger projects
- Identify potential improvement for capital projects
- Lower overhead costs by allowing ESCO to have your back with 24/7 plant support

## SOLUTIONS

### An Integral Component

ESCO provides cross-functional services that supplement plant automation, engineering, and construction. We work as an integral component within our clients' plants to enhance productivity, planning, and processes, resulting in mutually beneficial partnerships with expert safety standards integrated into every project.

ESCO provides industrial engineering services, offering front-end engineering design, plant support, documentation management, and process optimization.

### What You Can Expect

#### Site Visits

ESCO coordinates visits with plant personnel quarterly and during scheduled downtime.

#### 3 - 5 Year Planning

ESCO collaborates with our clients to develop a 3 to 5-year plan for each plant. Control system life cycle upgrade opportunities, process improvements, quick spend projects for year-end budget surplus, and other payback projects are submitted to plant and corporate personnel.

#### Front End Engineering Design (FEED)

ESCO has highly qualified engineers who, with years of experience, can align your business and project objectives, and develop a solid foundation for your plant projects.

#### Industrial Information Technology

We have engineers with advanced training in industrial IT who can help your network architecture keep up with the ever-changing world of technology.

#### Power Quality & Energy Management

ESCO will guide you to improve the quality of your power and manage your energy usage, so you can avoid expenses that affect your bottom line.

#### Process Optimization

Our P&ID verification and updates, control loop tuning, alarm management, data historian and reporting services will optimize your plant's processes.

#### Administrative Support

We provide support in billing, quotes, and job setup.

#### Value-Adding Solutions

ESCO provides alternative solutions for ongoing problematic projects and processes.

#### 24/7

We are there for you... 24/7, with professionals who can provide responsive and reliable services when you need them.

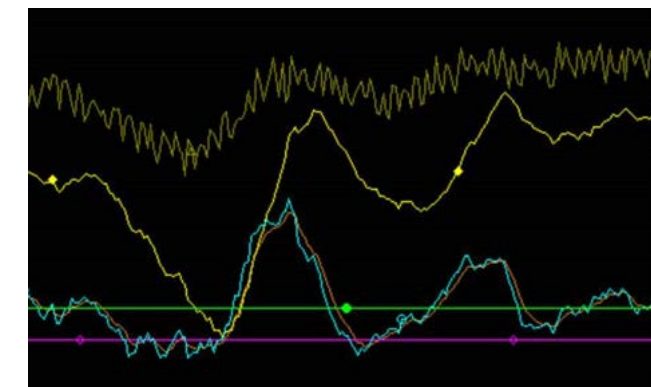

### Contact Our Division Manager

You are encouraged to contact our division manager to learn more about what we offer in Engineering Services. We are eager to learn about you and your facility so we can help you SAVE.
