

SAFETY DATA SHEET

1. Identification

Product identifier Oatey Clear Cutting Oil

Other means of identification

Product code

Synonyms Part Numbers: 30203, 30204, 30205

Recommended use Cutting oil for high speed thread cutting machines.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Company Name Oatey Inc.

Address 4700 West 160th Street

Cleveland, OH 44135

Telephone 216-267-7100 E-mail info@oatey.com

Transport Emergency Chemtrec 1-800-424-9300 (Outside the US 1-703-527-3887)

1-877-740-5015 **Emergency First Aid** MSDS Coordinator Contact person

2. Hazard(s) identification

Physical hazards Not Classified. **Health hazards** Not Classified **OSHA** defined hazards Not Classified.

Label elements

Hazard symbol None. Signal word None

Hazard statement This product does not require any hazard statements.

Precautionary statement

Prevention This product does not require any precautionary statements. Response This product does not require any precautionary statements.

Storage Not applicable. Disposal Not applicable.

Hazard(s) not otherwise

classified (HNOC)

Used Oil may contain harmful impurities.

3. Composition/information on ingredients

Mixtures

Chemical name CAS number % Mixture Petroleum Hydrocarbon Mixture >95

4. First-aid measures

Inhalation Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical

attention if symptoms occur.

Skin contact Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get

medical attention if symptoms occur.

Eye contact Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids.

Check for and remove any contact lenses. Get medical attention if irritation occurs.

Ingestion Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable

for breathing. If material has been swallowed and the exposed person is conscious, give small

quantities of water to drink. Do not induce vomiting unless directed to do so by medical

Oatey Dark Cutting Oil SDS US Version #: 01 Issue date: 12-May-2015 SDS# Revision date: Page 1 of 6

Most important symptoms/effects, acute and

delayed

Indication of immediate medical attention and special treatment needed.

personnel. Get medical attention if symptoms occur. Ingestion may result in nausea, vomiting, and or diarrhea.

Immediate medical attention is not required.

General information

Note to physician, treat symptomatically.

5. Fire-fighting measures

Suitable extinguishing media

Foam, water spray or fog. Dry chemical powder, carbon dioxide, sand or earth may be used for

small fires only.

Do not use water in a jet.

Unsuitable extinguishing media

Specific hazards arising from the chemical

Hazardous combustion products may include: A complex mixture of airborne solid and liquid particulates and gases, oxides of sulfur and phosphorous (smoke). Carbon monoxide.

Special protective equipment and precautions for firefighters

Fire fighting equipment/instructions Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Use water spray to keep fire-exposed containers cool. Fire water contaminated with this

material must be contained and prevented from being discharged to any waterway, sewer or

drain.

Specific methods General fire hazards None None

6. Accidental release measures

Personal precautions. protective equipment and emergency procedures

Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment. If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Methods and materials for containment and cleaning up Large Spills: Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see section 1 of SDS for emergency contact information and section 13 of SDS for waste disposal.

Small Spills: Move containers from spill area. Vacuum or sweep up material and place in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see section 1 of SDS for emergency contact information and section 13 of SDS for waste disposal.

Environmental precautions

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

7. Handling and storage

Precautions for safe handling

Use local exhaust ventilation if there is risk of inhalation of vapors, mists or aerosols. Properly dispose of any contaminated rags or cleaning materials to prevent fires. Put on appropriate personal protective equipment (see section 8 of SDS). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10 of SDS) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. Exposure controls/personal protection

Occupational exposure limits

Oatey Dark Cutting Oil SDS # Version #: 01 Revision date: Issue date: 12-May-2015 Page 2 of 6

US. ACGIH Threshold Limit Values

Components	Туре	Value
Oil Mist, Mineral	TLV or PEL	5 mg/m3
US OSHA Barraiasible Francesure Limite		
US OSHA Permissible Exposure Limits		
Components	Type	Value

Biological limit values Data Not available.

Appropriate engineering

controls

No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.

Individual protection measures, such as personal protective equipment

Eye/face protection

Safety eyewear complying with an approved standard should be used when a risk assessment

indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts.

Skin protection

Other

Hand Chemical-resistant, impervious gloves complying with an approved standard should be worn at

> all times when handling chemical products if a risk assessment indicates this is necessary. Appropriate footwear and any additional skin protection measures should be selected based on

the task being performed and the risks involved and should be approved by a specialist before

handling this product.

Respiratory protection Use a properly fitted, particulate filter respirator complying with an approved standard if a risk

assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the

selected respirator.

Thermal hazards None

General hygiene considerations

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the layatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

9. Physical and chemical properties

Appearance

10. Stability and reactivity

Reactivity The product does not pose any further reactivity hazards in addition to those listed in the

following sub-paragraph..

Chemical stability The product is stable.

Possibility of hazardous

reaction

Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid Extreme temperature and direct sunlight.

Incompatible materials Strong Oxidizing Agents.

Hazardous decomposition

Under normal conditions of storage and use, hazardous decomposition products should not be

products produced.

11. Toxicological information

Information on likely routes of exposure

Inhalation Mist from processing.

Skin contact Skin contact.

Eye contact Eye contact.

Ingestion No known significant effects or critical hazards.

Symptoms related to the physical, chemical and toxicological characteristics

No specific data.

Information on likely routes of exposure

Acute Toxicity

Components Species Results

Skin corrosion/irritation May cause skin irritation after prolonged exposure. Prolonged exposure or repeated exposure

without proper cleaning can clog pores of the skin.

Serious eye damage/eye

irritation

Expected to be slightly irritating.

Respiratory or skin sensitization

Respiratory sensitization Inhalation of vapors or mists may cause irritation to the respiratory system.

Skin sensitization This product is not expected to cause skin irritation.

Germ cell mutagenicity Not considered a mutagenic hazard

Carcinogenicity No component of this product is identified as a probable, possible, or confirmed carcinogen by

IARC, NTP, Monographs, or OSHA.

Reproductive toxicityNo known significant effects or critical hazards.

Specific target organ toxicity

Single exposure
Repeated exposure
Not expected to be a hazard.
Not expected to be a hazard.

Aspiration Hazard Contains Distillates (petroleum), hydrotreated – Which is a category 1 Aspiration Hazard. The

likely hood of aspirating the product in this form is very low due to the high viscosity.

Chronic effects Not Classified.

Further informationUsed oils may contain harmful impurities that have accumulated during use. The concentration of such impurities will depend on use and may present risks to health and the environment on

of such impurities will depend on use and may present risks to health and the environment on disposal. Used oil should be handled with caution and skin contact should be avoided when

possible.

12. Ecological information

Ecotoxicity

Product/ingredient name	Results	Species	Exposure
Petroleum Distillates			
	Acute LC50 2,900 μg/l Fresh water	Fish - Rainbow trout, Donaldson trou	t 96 h

Oatey Dark Cutting Oil SDS US
SDS # Version #: 01 Revision date: Issue date: 12-May-2015 Page 4 of 6

Fish - Bluegill Acute LC50 2,200 µg/l Fresh water

Persistence and degradability Not Available. Bio accumulative potential Not Available.

Mobility in soil Liquid under most conditions. Floats on water. If it enters soil, it will adsorb to soil particles and

will not be mobile.

Other adverse effects No known significant effects of critical hazards.

13. Disposal considerations

Disposal instructions The generation of waste should be avoided or minimized wherever possible. Disposal of this

> product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways,

96 h

drains and sewers.

Local disposal regulations Not Applicable Hazardous waste code Not Applicable
